

VALCam Professional Series ID Cameras

Pro - Pan, Tilt and Zoom Camera

Zoom Only Camera

Do you want excellent quality pictures for your ID cards with the minimum amount of effort? Then the **VALCam Professional Series** is right for you. With the **VALCam Professional Series** you have mouse and keyboard control of pan, tilt, and zoom.

Don't accepted poor quality images as par for the course. The **VALCam Professional** series is specifically designed to capture the highest quality images for transfer to ID badge cards as quickly and efficiently as possible. No multiple steps or long transfer times to slow you down. We know where the bottlenecks are and have tackled those problems head on.

Our innovative strobe lighting and flash options guarantee high quality images in any situation, even dark rooms. Bright light or no light, you'll get the same great picture with VALCam. The **VALCam Professional Series** offers a complete solution including camera, USB or PCI capture card, flash, software drivers, and mounting hardware. An optional tripod is available.

Would you like to customize the **VALCam** software to work with your software package? We make it easy with our Software Developer's Kit.
